

gds::DataInfo

```
graph BT; MatrixInfo[gds::MatrixInfo] --> DataInfo[gds::DataInfo]; VariantInfo[gds::VariantInfo] --> DataInfo[gds::DataInfo];
```

The diagram illustrates a class hierarchy. At the top is a box labeled 'gds::DataInfo'. Below it, a horizontal line connects two boxes: 'gds::MatrixInfo' on the left and 'gds::VariantInfo' on the right. From the center of this horizontal line, an arrow points upwards to the bottom of the 'gds::DataInfo' box, indicating that both 'gds::MatrixInfo' and 'gds::VariantInfo' inherit from 'gds::DataInfo'.
